

Who are we ?

About us

Rennatto is a French company that has developed an innovative service for making accommodation bookings for short stays.

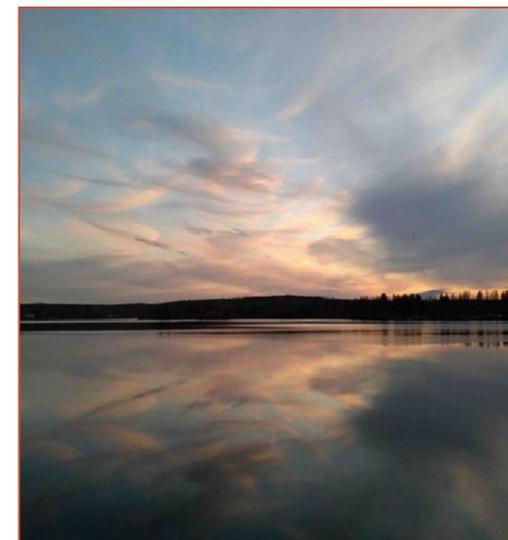

Fast, easy and secure, our platform gives you the opportunity to expand your guests base by accessing requests from prospective guests looking for accommodation in your area.

Do you rent regularly or occasionally ?

About you

You have an apartment, a villa or a bed and breakfast that you rent for short stays.

Rennatto gives you access to potential future guests in just a few clicks. No need to spend a lot of money on other platforms or websites where you always have to pay more to allow your ad to appear at the top of the list and hope to be seen by as many people as possible. With Rennatto, you are as lucky as the others, you are not drowned among thousands of competing ads or relegated to the bottom of the list, but it is the quality of your service that will make the difference.

Why Rennatto ?

- Rennatto was created to allow a web user looking for accommodation (hotel, apartment, villa, ...) during a trip to issue a request for short-term accommodation, and to receive in return proposals for accommodation offers with the guarantee to match his expectations and not to exceed his budget.
- The objective of Rennatto is to simplify the online search for a short-term lodging and to facilitate trade between the traveler and the host especially with the completion of an online quote.
- Rennatto also offers to secure the booking by providing a deposit collection service to guarantee the payment or refund if necessary.
- The Rennatto services are above all a time saver for the web user looking for an accommodation, the fees for use of the platform are exclusively billed to him.

Example of an accommodation card

What should I do ?

Here are the guiding principles...

First step, you register the accommodation by completing a descriptive card.

Once registered, you will be able to connect to your personal space from which you will access the list of accommodation requests in the geographical area of your accommodation.

You can choose to respond in a few clicks to the requests you have selected. The response form that you validate will automatically generate a quote that will be proposed to the user initiating the request. If the latter accepts your offer, the quote will become the contract of the reservation.

Do you think that our system is complicated to implement or that you have to be an IT expert to use our platform ?

Not at all ! We have created interfaces and forms very simple and intuitive that will allow you to achieve autonomously and quickly all actions such as the creation of the card of your accommodation, the consultation of a request or the formulation of an offer.

« Unlike other OTA⁽¹⁾, no commission, no commitment, no clause on overnight rates. You remain in total command! »

Totally free and without constraints

Unlike other OTA, no commission, no commitment, no clause on overnight rates. You are free to use our services or not, to register or unsubscribe at any time.

You exchange directly with the guest

Another advantage of our platform, the possibility of conversing directly with the future guest and thus prepare the best delivery. All these exchanges are recorded in the quote to avoid any future dispute.
